

3 WAY SCREENER

DESCRIPTION

This self-contained plant is complete with a receiving hopper, double-deck screen, three-cylinder diesel engine, three stock-piling conveyors, all mounted on a track chassis with remote control.

It is designed for customers who need three screened products and is ideal for landscaping, golf courses, crushed rock, hard core and beach cleaning.

The screened material can be separated exactly where it is needed on site. Oversize and undersize contamination can be removed to create useable finished products from waste.

It can be fed by excavator or directly from a crusher conveyor.

The compact dimensions and low weight mean it can be easily transported and the conveyors fold hydraulically so the plant can be set up in a minute.

STANDARD FEATURES

- Feed hopper
- Choice of screen meshes
- Umbilical Remote Control
- 80 Tonnes per hour output (depending on material size and operating conditions)
- 18.5kw Kubota water cooled diesel engine
- Fuel consumption approximately 4 litres per hour

DIMENSIONS

	Operating	Travel
• Length	5.58m	4.29m
• Width	3.31m	1.88m
• Height	2.19m	2.39m
• Weight	2854kg	2800kg
