Kubota, the world's leading manufacturer of mini-excavators, brings you the KX080-3. It's the high-quality, high-performance, 8-tonne excavator versatile enough to meet all of your needs.

Kubota original direct injection engine
Combined with its advanced hydraulic system, Kubota's original DI engine helps to maximise the strength of digging force and minimise the noise level, fuel consumption and exhaust emissions. Primary points, like the engine and air cleaner, can be inspected and maintained quickly and easily thanks to the convenient rear engine cover.

Digging force
The KX080-3 offers a well-balanced arm and bucket to provide the operator with unparalleled digging force. This means that the KX080-3 can dig faster and more efficiently, even in the toughest conditions.

Compact machine width
The KX080-3’s narrow 2200 mm width makes it ideal for working in close conditions, and much easier to transport between job sites.

Two-speed travel with auto-shift
For smooth and efficient travelling operation, the KX080-3 is fitted with an automatic shift feature. This provides effortless travel for the operator while travelling in the high-speed mode. During travel operation (e.g. turning, tracking on slopes, travelling through muddy areas and heavy duty dozing work), travel speed drops depending on the load; however, the traction force is increased. Once the load is reduced, the machine will automatically return to high-speed position.

ALL NEW KUBOTA EXCAVATOR
KX080-3
Auto idling system
Kubota’s Auto Idling System is fitted as standard. When high engine RPM isn’t needed, or when control levers are left in neutral for longer than 4 seconds, the idling system automatically reduces the engine to idling RPM. When the levers are moved again, engine RPM is immediately reset to the dial-set RPM. This innovative feature reduces noise and exhaust emissions, in addition to saving energy and running costs.

Adjustable maximum oil flow on auxiliary circuit (SP1)
The maximum oil flow rate of the additional control circuit can be changed/adjusted by simply pushing a switch—there’s no need for additional tools or manual adjusting procedures. This simplifies the utilisation of front attachments like tilt buckets, brush cutters and hydraulic hammers—you can reduce or increase the flow to get just the right amount of control.
*The maximum oil flow can vary according to the load of front attachments.

Load-sensing hydraulic system
Kubota’s load-sensing hydraulic system ensures smoother operation, regardless of load size. It allows hydraulic oil to flow according to the specific range of the operator’s lever motion. As a result, it reduces fuel consumption and delivers greater overall operating performance.

Tight tail swing
The KX080-3 is designed with a shorter rear overhang, ensuring improved workability in restricted space, increased versatility, and better stability. The rear overhang also features cast-iron protectors, which significantly reduce damage to the machine in space-restrictive work sites.
Efficient, durable and reliable—the KX080-3 excavator is the ultimate machine for most digging applications.

ROP/FOPS cabin
Kubota has adopted a cabin that is certified as a Roll-over Protection Structure and a Falling Object Protection Structure. Coupled with the safety belt, this ensures maximum operator safety.

3 bonnets for service access
For maximum ease of inspection and maintenance, the KX080-3 is designed with 3 bonnets.

Control valve
The control valve is conveniently located next to the cabin. To inspect the control valve, the bonnet cover can be opened easily and quickly with a simple flip of the latch.

Rubber crawler
The steel-core positioning and lug pattern on the KX080-3 rubber crawler was methodically designed after intensive research and testing to assure long life, outstanding durability, and lower vibration when travelling.

Tank electric refuelling pump
The KX080-3’s new, standard refuelling pump includes an auto-stop function that reduces spillage and increases safety. And, the tank can be completely filled in approximately three minutes.
Safety (anti-drop) valve on the boom (ISO8643)

The KX080-3 is fitted with a boom-lowering control device (ISO8643) as standard.

Anti-Theft System

The ultimate in security that's as easy as turning a key. It's the industry's first standard-equipped anti-theft system, and another original only from Kubota.

THE SYSTEM

Introducing Kubota's new simple and secure anti-theft system. Our one-key-system has an IC chip, which only starts the engine when the system recognises the appropriate key. Standard equipment includes one Red programming key, plus two Black operational keys. And up to four Black keys can be programmed. What's more, you get peace of mind knowing your construction equipment couldn't be in safer hands.

SAFETY/SECURITY

Only "programmed keys" will enable the engine to start. Even identically shaped keys can't start the engine unless they are programmed. In fact, attempting to start the engine with an un-programmed key will activate the system's alarm. This alarm will continue even after the un-programmed key is removed. It will only stop once a programmed key is inserted into the ignition and switched on to start the engine.

EASY PROGRAMMING

One Red programming key and two pre-programmed Black operational keys come standard. If a Black key is misplaced, or if additional Black keys are needed (a maximum of two can be added), key programming is easy. Simply insert the Red key, followed by the Black keys.

EASY OPERATION

No special procedures needed. No PIN numbers needed. Just turn the key. Plus, our simple "one-key-security system" allows access to the cabin door and engine bonnet as well as the fuel tank.

Programmed key

Insert key → The excavator moves

Un-programmed key

Insert key → The alarm sounds

Insert the Red programming key, then press the monitor button.

Insert new individual Black operational key.
The KX080-3 2-Piece Boom version delivers a wide working range, smooth operation, and the versatility you need for tough jobs of all sizes.

**Dynamic working range**
The 2-piece boom offers a versatile working range so you can reach farther, deeper, closer and anywhere in between.

**Expanded working range**
The versatile 2-piece boom offers a long reach and close retraction to make levelling large areas more efficient and productive. Plus, it’s easy to dig close to the machine, eliminating the need for constant repositioning. It’s particularly effective when working in narrow spaces.

- **Extended reach**
- **Close digging capability**

**Impressive dumping range**
The 2-piece boom enables you to dump farther and higher, and offers a high bucket bottom position, making it smooth and easy to dump onto lorries without repositioning the excavator.

- **High dumping reach**

**Efficiency in narrow spaces**
When space is restricted, the 2-piece boom manoeuvres easily to simplify vertical digging and efficiently make deep walls at 90° angles. And, it offers a compact front swivel radius to make turning and lifting operations in tight spaces even easier.

- **Efficient vertical digging**
2-PIECE BOOM VERSION

Easy boom control
The user-friendly design and location of the 2-piece boom pedal makes operation extremely simple. Located to the left of the driving pedals, the operator simply needs to flip the footpad, and depress the right side of the pedal to extend the boom, or the left side to retract it. This feature greatly simplifies the footwork necessary to smoothly operate the boom.

Depress the pedal on the right or left side to extend or retract the boom.

Smooth simultaneous operation
Kubota’s 2-piece boom offers reliably smooth and fast performance. Its innovative hydraulic mechanism enables the operator to easily run the arm, boom, bucket, and swivel simultaneously, boosting work efficiency and increasing productivity.

Versatility
Unlike competitor models, the 2-piece boom version features a second auxiliary circuit (SP2) as standard equipment, making it easy to use a wide variety of attachments. It also adapts the adjustable maximum oil flow rate system for the first auxiliary circuit (SP1), which can be controlled with the simple push of a switch. Whatever the job, the KX080-3 can complete it efficiently and effectively.
Kubota has upgraded the cabin features on the KX080-3 to make it the most comfortable cabin in its class.

Operator comfort
To enhance operator comfort, Kubota has improved the cabin design. The large windows offer improved visibility for the operator and the lower-front-window-glass can be easily removed and kept behind the seat. Two speakers, aerial, and wiring harness are fitted as standard. The cabin is also equipped with storage space behind the operator seat and a cup holder.

Deluxe suspension seat
Kubota’s standard, adjustable suspension seat reduces strain and improves comfort for the operator.

Air conditioning
The KX080-3 features an air conditioner as standard.

Kubota’s Intelligent Control System keeps you informed with timely diagnostic readings and routine maintenance alerts that can reduce downtime and repair costs. The large digital panel displays current working conditions, and warning indicators for engine RPM, fuel, temperature and oil levels. It even tells you when the tank is nearly full during refuelling.
Standard Equipment

Engine/Fuel system
- Double-element air filter
- Electric fuel pump
- Auto idling system
- Tank electric refuelling pump

Undercarriage
- 450 mm rubber track
- 1 x upper track roller
- 5 single-flange track rollers on each track
- 2-speed travel switch on dozer lever

Hydraulic system
- Pressure accumulator
- Hydraulic pressure checking ports
- Straight travel circuit
- Third line hydraulic return
- Load-sensing hydraulic system
- Adjustable Maximum oil flow on Auxiliary Circuit (SP1)
- Double auxiliary circuit for accessories
- Auxiliary switch (SP1) on right control lever
- Auxiliary switch (SP2) on left control lever
- Bracket and harness for beacon light
- Two-speed travel with auto-shift

Safety system
- Engine start safety system on the left console
- Travel motor with disc brake
- Swivel motor with disc brake
- Overload warning buzzer
- Kubota original anti-theft system
- Anti-drop valve on the boom (ISO8643)

Working equipment
- Auxiliary hydraulic circuit piping to the arm end
- 2 working lights on cabin and 1 light on the boom
- 2100 mm arm

Cabin
- ROPS (Roll-over Protective Structure, ISO3471)
- FOPS (Falling Object Protective Structure) Level 1
- Weight-adjustable full suspension seat

Optional Equipment

Undercarriage
- 450 mm steel track (+ 100 kg)

Working equipment
- 1750 mm arm (- 22 kg)

Safety system
- Anti-drop valve unit (arm and dozer)

Others
- Special paint upon request
- Without extra counter weight (- 235 kg)
SPECIFICATIONS

*with rubber shoe, JPN bucket and 2100 mm arm

Machine weight (w/o extra counter weight) kg 8195 (7960)
Bucket capacity, std. SAE/EECE m³ 0.25/0.21
Bucket width
With side teeth mm 800
Without side teeth mm 700

Engine

Type Water-cooled, diesel engine 8L VFECS (Electronic, turbocharged type)
Output ISO9249 PS/rpm 65.0/2000
KW/rpm 47.8/2000
Number of cylinders 4
Bore × Stroke mm 100 × 120
Displacement cc 3769

Swivelling speed rpm 9.5
Rubber shoe width mm 450
Tunnel distance mm 2300
Dozer size (width x height) mm 2200 × 500

Hydraulic pumps

P1, P2 Variable displacement pump
Flow rate l/min 72.0 × 2
Hydraulic pressure MPa (kgf/cm²) 27.5 (280)
P3 Gear type
Flow rate l/min 66.6
Hydraulic pressure MPa (kgf/cm²) 20.6 (210)

Max. digging force
Arm kN (kgf) 38.1 (3880)
Bucket kN (kgf) 65.2 (6650)

Boom swing angle (left/right) deg 70/60
Minimum front swivel radius with boom swing (left/right) m 2030/2180
Auxiliary circuit (SP1) Max. flow rate l/min 100
Max. hydraulic pressure MPa (kgf/cm²) 20.6 (210)
Auxiliary circuit (SP2) Max. flow rate l/min 66.6
Max. hydraulic pressure MPa (kgf/cm²) 20.6 (210)

Hydraulic reservoir ε 75
Fuel tank capacity l 115
Max. travelling speed
Low km/h 2.8
High km/h 5.1
Ground contact pressure kPa (kgf/cm²) 35.6 (3.63)
Ground clearance mm 390

WORKING RANGE

* Specifications are subject to change without notice for purpose of improvement.

** With extra counter weight

LIFTING CAPACITY

* With extra counter weight
