

TH412e Telehandler

Electric, environmentally-friendly, and powerful

The Th412e is the first pure electrically-operated telehandler by Wacker Neuson. Its power ratings correspond to those of a conventional diesel-operated machine. The installed 96-Volt lithium-ion battery is available in two power ratings so that the running and charging times can be optimally coordinated with the work requirements. The TH412e works on-site completely free from exhaust gases and with significantly lower noise emissions. For the end user, this means greater flexibility in application, environmental protection and significant savings with operating costs. As a result, features such as compact dimensions, all wheel steering, low center of gravity, and excellent stability are likewise true of the electrically-driven machine.
